PROJECTS

IoT-Based Non-Invasive Glucose Monitoring System

- Developed a machine learning-based system to estimate blood glucose levels using PPG signals, blood pressure, and demographic data without invasive procedures.
- Implemented signal preprocessing and optimized XGBoost for accurate glucose prediction and early risk alerts.
- Integrated BLE connectivity and built a lightweight interface using HTML, JavaScript, and SQLite3.

Smart Task Manager — Full-Stack Web Application

- Developed a full-stack Smart Task Manager using React, Node.js, Express, and MongoDB, implementing 4+ RESTful APIs to manage 100+ tasks with priority classification and deadline tracking.
- Improved task organization efficiency by 30% through responsive UI design and optimized backend data handling.

ACHIEVEMENTS

- Solved 150+ problems on LeetCode, 300+ on HackerRank, and 300+ on CodeChef, demonstrating strong DSA proficiency; earned 1 Gold Badge (Java) and 1 Silver Badge (Problem Solving) on HackerRank.
- Maintained consistent academic excellence with 98% in Intermediate and 100% in SSC.
- Led a B.Tech project team by defining milestones, allocating responsibilities, and driving execution to achieve 100% successful and on-time project delivery.

CERTIFICATIONS

- Introduction to Cyber Security – Cisco
- Operating System Fundamentals and Support
- Data Analytics with Python (5-Day Crash Course) – Innomatics Research Labs
